

we listen to K-Love on 88.3 broadcast on FM translator for our local community every day. It is the one radio station that I don't have to worry about what message is being sent to our 8 children. Any other station you turn to there is foul language, sexual content and violence mentioned every minute of some sort. We have a positive, encouraging choice to give our teenagers that is family-friendly. Please don't take it away. Our local community and each individual would be affected without K-LOVE because what might be broadcast instead is the same junk that the rest of the stations play. I believe with all of the negative influences that bombards all of our daily interactions, K-LOVE is the one constant positive truth that the public needs to be encouraged and uplifted no matter what life circumstance you find yourself in.
